Figure 1 is a line graph showing the number of cases of COVID-19 in the United States from March 2020 to March 2021. The x-axis represents time in months, with labels for March, May, July, September, November, January, and March. The y-axis represents the number of cases, with labels for 0, 10,000,000, and 20,000,000. The graph shows a sharp increase in cases starting in March 2020, peaking in May 2020 at approximately 18,000,000 cases, followed by a decline and then a second, smaller peak in November 2020 at approximately 10,000,000 cases. The number of cases then declines again, reaching approximately 2,000,000 cases by March 2021.
